Career Objective

Passionate and detail-oriented Flutter developer aiming to build a fulfilling career in software engineering. I thrive on solving real-world problems through clean, scalable code and modern mobile technologies. In addition to mobile development, I actively contribute to backend systems by creating and integrating APIs using technologies like NestJS and Firebase. Committed to continuous learning and growth, I strive to build impactful, user-centered solutions in dynamic and collaborative environments.

Work Experience

Software Engineer I
Sheba Platform Limited - sheba-platform.xyz
Banani, Dhaka, Bangladesh.
July 2024 – Present
- Maintaining and enhancing existing Flutter codebases to ensure stability, performance, and scalability across production applications
- Designing and implementing new mobile features with clean, well-structured, and well-documented code
- Collaborating closely with cross-functional teams to improve app responsiveness using efficient state management and architecture patterns
- Contributing to backend tasks such as API integration, debugging, and minor updates using NestJS and Firebase services

Junior Software Engineer (Flutter)
Bringin Technologies Limited - getfit.com.bd
Dhaka, Bangladesh.
June 2023 – July 2024
- Developed a scalable Flutter application with proper state management and RESTful API.
- Refactored legacy code to improve performance and maintainability
- Integrated Socket.io for real-time data updates and Agora SDK for voice and video call.
- Contributed to CI/CD workflows and participated actively in Agile development processes
- Wrote clean, modular, and maintainable code aligned with best practices and team standards

Flutter developer
Code Village - codevillage.com.bd
Dhaka-1230, Bangladesh.
May 2022 – June 2023
- Built and maintained scalable Flutter applications with effective state management and RESTful API consumption
- Developed reusable components and UI modules for consistency and code reuse
- Worked in a collaborative Agile environment, delivering features through iterative development and regular sprints

Technical Skills

Mobile App Development
- 3.0+ years of professional experience building cross-platform mobile applications using Flutter
- Specialized in advanced integrations such as Google ML Kit for face detection and liveliness
- Experienced in state management using GetX, Riverpod, and Provider
- Strong focus on Clean Architecture, SOLID principles, and writing scalable, maintainable code
- Integrated third-party services like Google Maps API, Agora SDK, and payment gateways etc.

Backend Development
- Developed and maintained scalable server-side applications using NestJS
- Proficient in API design, versioning, and documentation using Swagger
- Worked with cloud-based databases such as Firebase Firestore and MongoDB for structured and flexible data storage

Programming Languages
- Proficient in Dart, TypeScript, and JavaScript
- Practicing Go (Golang) at an early stage

Dev Tools & Technologies
- Tools: Postman, Swagger, Firebase Console, Git, GitHub
- CI/CD and deployment to Google Play Store and Apple App Store

Project & Workflow Management
- Familiar with Agile methodologies and collaborative team environments
- Tools: Jira, Trello, Notion, Slack

Projects

AskGemini
Interactive Flutter app leveraging gemini API to answer user queries via text and images. Showcases advanced API integration and dynamic UI design. Check out the project on GitHub.

CraftyBay
FLutter e-commerce app with product browsing, cart management, and authentication. Explore the project on GitHub.

ProgressPal
Comprehensive task manager app using Flutter and rest APIs for efficient task handling and state management. Discover more about this project on GitHub.

Other Projects
- ChatX - Real-time chat app leveraging Socket.io.
- KhaboKi - Catering and food ordering app with a NestJS backend and scalable Flutter frontend
