## CAREER OBJECTIVE

As a passionate Flutter developer dedicated to creating innovative solutions and solving complex problems, I am driven to build a fulfilling career as a software engineer. Committed to excellence, I am eager to leverage my strong coding skills and enthusiasm for learning to contribute to impactful software development. My objective is to continuously expand my knowledge base and develop cutting-edge technologies, making meaningful contributions in the dynamic field of software engineering.

## WORK EXPERIENCE

**Flutter developer**                                                June 2023 – Present
Bringin Technologies Limited,                                      Visit: getfit.com.bd
Dhaka, Bangladesh.
**Responsibilities:**
- Designed and developed highly scalable features using GetX state management and REST APIs.
- Optimized app performance through code refactoring and efficient use of Socket.io for real-time updates.
- Successfully implemented Agora SDK for in-app voice and video calling, enhancing user engagement.
- Collaborated effectively within an Agile development team, adhering to CI/CD practices.
- Maintained clean and well-documented code, ensuring maintainability and code quality.

**App I maintained:** Unbolt  
**App I developed:**
- Getfit
- Getfit Professional

# PROJECTS

**AskGemini**

Description:  An interactive application utilizing the Gemini API to provide answers to user queries through chat or image inputs. It offers robust solutions for text-based questions and image descriptions, ensuring information is accessible and user-friendly. Check out the project on GitHub.

**CraftyBay**

Description: A sophisticated Flutter e-commerce application that utilizes a REST API and GetX for state management. Explore the project on GitHub.

**News Reader**

Description: A user-friendly app designed to keep you updated with the latest news. It integrates API for fetching news, uses Riverpod for state management, and Hive for local storage. Check out the project on GitHub.

**ProgressPal**

Description: A comprehensive Flutter task manager application that leverages REST API and GetX for efficient task handling. Discover more about this project on GitHub.

**SquareGhost**

Description: A versatile Flutter CRUD application featuring Firebase Authentication and Realtime Database. This app utilizes Firebase Authentication for secure access and a Realtime Database for seamless data synchronization. View the project on GitHub.

**Real-Time Location Tracker**

Description: This Real-Time Location Tracking App employs Google Maps and Flutter to provide accurate location tracking services. Visualize locations in real-time for enhanced awareness. Learn more about the project on GitHub.

**W E A T H E R !**

Description:  An intuitive application that allows users to check current weather conditions for various locations using a seamless interface. Find the project on GitHub.

# PROFESSIONAL TRAINING

**Mobile Application Development with Flutter**
Ostad - Flutter Batch 3 | Certificate of Completion, Certificate of Assessment.
Mentor: Md Rafat J. Meraz
Software Engineer,
Vivasoft Limited.
